

# Art Of Empathy

## **1. Delightful Darkness**

never forget  
the last time  
when you looked  
with the eyes of a child

never forget  
the child  
in your own  
soul

first, there was this frightening sound  
and after the children left the place  
we were so excited to enter these dark realms

enter these realms  
don't be scared at all  
welcome the nightfall  
and don't be scared at all

into these spheres  
I felt the touch of your eyes  
I saw the face of a truth  
and the meaning of lies

I felt your lips in my neck  
and the blade of a knife  
I smelled the odour of death  
and a marvellous life

## **2. Winter's Dancing**

keep the snowflakes in your mind  
but stay away from the frost  
can you remember any kind  
or are they already lost?

winter's dancing

### **3. RAW**

louse kills leave  
bug kills louse

bird kills bug  
fox kills bird

man kills fox  
arrogance kills man

### **4. Dow Joneses Lullaby**

rest yourself in me  
motionless  
accept yourself to be  
silent

you cannot control the way you're suffering

### **5. Tiny Doll**

tiny doll

laying in bed  
almost midnight  
the sound of her breath  
I know she's all right

she came to me  
like in a dream  
she's a star you won't forget

I couldn't believe  
her choice for me  
she's a star you won't forget

my tiny doll  
tiny doll

now she is with me  
still can't believe it  
she's a star you won't forget

hope she'll be fine  
that she keeps on shining  
like a star you won't forget

my tiny doll  
tiny doll

## **6. Those Days**

desperate times, my heart longs for thee  
the past is like an old friend to me

you know that those days  
were the best you had  
and you won't forget

every single thing you did  
all the mouths you fed  
everyone you've met

I see the blinking in your eyes  
when you tell to me  
how they disagreed

when you said it was no use  
to be angry  
with their enemy - the time

you know that it's time  
to realise  
where you're standing now

although you already knew  
how it was  
to loose someone

it never was this hard  
and you can't forget  
the last words he said

all these memories, you'll see  
they will ease your pain  
you will find your way

everlasting faith makes strong  
I admire you  
for the things you do

now believe me, he will stay  
always at your side  
even when the light is pale

## **7. Detachment**

you can let this song...  
why you waited so long?

new traces are born  
while old places forlorn

somehow

stuck in your lies  
when you realise  
it's sucking you dry  
and you realise  
it's time for a change

and somehow  
it feels so unreal  
but although  
it's for real

this trace is unknown  
but this time it's for real

## **8. Met**

*instrumental*

## **9. Believe**

the sound of their breath  
is filling the holes in your sky  
you will know, sure you will know what to do  
when the birds, they fly south  
and you will know what to do when the leaves fall  
when the wind gets colder  
and ice is growing around your eyes  
frozen tears  
they can be melted and you know how to  
you can get warmer and you know how to  
you will find a way  
I'm sure you'll find a way

it's said that your world is unreal  
although you hear and see them shine  
and your desire makes you feel  
like they want you to analyse their rhymes

yeah there are many who believe  
so why, shouldn't you longer prey?  
that search is part of your own dreams  
who am I to keep you away?

and I just hope to meet you one day  
in a world no more this hard  
that you shouldn't longer pay  
for being the beautiful girl you are

oh I believe in silver shine  
upon you  
yeah I believe you will be fine  
oh

believe you will stay

when sun fades away  
when sky only promises nothing but grey

and it's raining inside  
believe you will find  
a way to recover, to free your own mind

## **10. Happily Ever After**

*instrumental*

## **11. Dwelling In Light**

I came to forget  
that dwelling in light  
seems to rubbish my fight
